

### MTEEx Stickers and Logos

The sticker was introduced as a feature to promote awareness of equipment approved by the Laboratory.

The Sticker with controlled document number MTEExDOC082 was developed for this purpose and will be issued to clients who either request them or more specifically for clients who do quality control testing of final products (Batch Testing) at the Laboratory.

Stickers are not to be handed out randomly and the correct number of stickers is handed to clients to apply to their products that were tested/inspected by the Laboratory (i.e. by Batch Testing). The sticker can in no way be regarded as a substitute marking to the Standard required marking but indicates that the product was inspected/tested at the Laboratory.

MTEExDOC082 Product Sticker:

#### MTEEx Laboratories Logo:

The Logo is for the sole use by the Test Laboratory.
